SAMPLE QUESTIONS: C_HANAIMP_12

SAP Certified Application Associate - SAP HANA (Edition 2016 - SPS12)

Disclaimer: These sample questions are for self-evaluation purposes only and do not appear on the actual certification exams. Answering the sample questions correctly is no guarantee that you will pass the certification exam. The certification exam covers a much broader spectrum of topics, so do make sure you have familiarized yourself with all topics listed in the exam competency areas before taking the certification exam.

Questions

1. Which SAP HANA column types are part of an SAP HANA graph workspace?

Note: There are 2 correct answers to this question.

a)	O	Source vertex column
b)	O	Edge key column
c)	O	Calculated column
d)	O	Generated column

2. In a graphical calculation view of type cube, two tables are joined on multiple columns in a join node. Most queries using the view have no problems, but one query always gets a query runtime error.

What is the cause of this error?

Note: There are 2 correct answers to this question.

a)	O	The two tables do NOT have referential integrity.
b)	O	An incorrect column was selected when the join was formed.
c)	O	The language column is NOT specified in the join.
d)	O	The two tables are joined with a dynamic join.

3. Which SAP HANA studio function displays the views that will be affected when you rename an attribute view?

Please choose the correct answer.

a)	O	Neighbor
b)	O	Where-used list
c)	O	Properties
d)	O	Tables used
